

I Support all female
Scientists and
encourage females
to join science
and learn it.

Marie Curie

Marie was famous for her life
changing discovery of radium and
polonium and her huge contribution to
finding treatments for cancer. I personally
think Marie had one of the most greatest
discoveries in history. I find it fascinating
how she worked with radio active stuff
with no protection on her body. She died because
of some of the radio active things she worked
with. She died 4th of July 1867. She was 66
when she died. She was one of the first
people to win the noble prize twice. One in
Chemistry, one in physics.
